PRODUCT(S)
Black WallShield

PROJECT DESCRIPTION

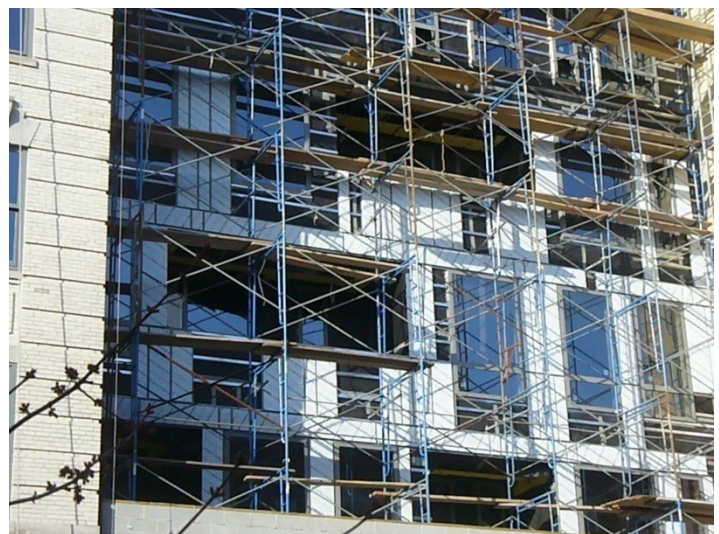

The Garden Street Lofts is a century-old renovated warehouse with a modern zinc-clad addition resulting in Hoboken's only green, LEED Certified residence. The development consisted of the renovation and conversion of a five-story, 35,400 sq. ft. former coconut warehouse, originally constructed in 1911 to luxury residential condominiums. The seven-story condo project will house 30 new residences ranging in size from 1,000 to 2,250 sq. ft. and provide 8,150 sq. ft. of ground floor retail space.

ENVIRONMENTAL IMPACT

VaproShield's Black WallShield is perfect for installations requiring an environmentally responsible product.

VaproShield products were designed with nature and the built environment in mind and are 100% recyclable. WallShield is constructed from a three-layer, spun bonded polypropylene fabric. WallShield is inert and can be recycled into its original bead form for reuse in other manufacturing processes.
